

Project Risk Management

The objective of this workshop is to provide participants with an understanding of project governance, the project lifecycle and how to effectively address uncertainties in a way that maximises opportunities and minimises adverse impacts on project objectives. This workshop applies to a range of projects including infrastructure delivery, business transformation, ICT, research and development, and service delivery.

KEY TOPICS

- ✓ Project characteristics
- ✓ Integrating risk management into project planning, delivery and control
- ✓ Understanding the project context
- ✓ Risk appetite and the triple constraints
- ✓ Exercises in identifying and assessing project risks
- ✓ Using risk information
- ✓ The role of project governance in risk-based decision-making
- ✓ Understanding why projects fail
