BCI Professional Practices Training

SUPPLY CHAIN RESILIENCE TRAINING COURSE

Course Description

This course is about understanding supply chains, how they are managed and how to add resilience measures to them, and therefore, the business. It is about how to engage with those responsible for procurement and their teams to embed business continuity and resilience into the business supply chain.

In the current climate of financial austerity, volatile markets and globalisation, supply chains are often under complex and global pressure. Suppliers may be located in areas of the world that suffer considerable threats from severe weather systems and many logistical problems.

Learning Objectives

On completion of this course, participants will be able to:

- Understand supply chain management and its relationship to business continuity and resilience
- Identify supply chain risk and vulnerabilities
- Develop strategies and solutions to enhance supply chain resilience
- Understand the requirements for implementing appropriate response plans for supply chain disruptions

Who should attend?

- Business continuity and resilience practitioners who want to further develop their knowledge in supply chain resilience
- Those responsible for supply chain management, sourcing, procurement and contract management who want to better understand and mitigate their supply chain risks
